## 1.0 INTRODUCTION

### 1.1 Project Background

Resource Applications, Inc. (RAI) received Work Assignment Number 40 under Contract Number 68-W8-0109 from the United States Environmental Protection Agency (EPA) to conduct a Multi-site Records Search for the Grand Calumet River/Northwest Indiana Enforcement Initiative. RAI was requested to research and report on 13 sites in the subject region, of which six are to receive priority attention and narratives. This effort was undertaken to identify potentially responsible parties (PRPs), including owners, operators, transporters and generators, who may be liable for clean-up expenses under Section 107 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) as amended by the Superfund Amendments and Reauthorization Act (SARA). The Grand Calumet River drains a heavily industrialized watershed area of northwest Indiana at the southern tip of Lake Michigan. Poor water quality and aquatic habitat problems are reflected in both the high concentrations of pollutants in the river sediments and overlying water column and the reduced level of biological activity.

U.S EPA Region 5 has initiated an investigation into the source of the identified pollutants. Thirteen sites have been selected for the search. On October 9, 1990, Section 104(e) Information Requests were sent to the owners of the 13 sites. Under this work assignment, RAI organized and indexed Section 104(e) Information Request response documents and other information obtained from EPA Region 5 sources according to document control numbers (DCNs). The following report serves as a summary of these indexed documents for the Gary Development Company facility in Gary, Indiana, one of the six prioritized sites.

### 1.2 Site Background

The Gary Development Company facility is also referred to as the Gary Development Landfill, the Gary Land Development Landfill, the Gary Development Corporation, and the Gary Land Development Company. All five names are used interchangeably in the documents collected. For the purpose of this summary, Gary Development Landfill will represent the facility and Gary Development Company will represent the facility's operator.

Gary Development Landfill is an active sanitary landfill in Gary, Indiana (DCN 439). It is a private facility handling solid and liquid waste derived from public, commercial, and municipal accounts (DCN 127, 413, 439). The facility was constructed in an abandoned, water-filled, sand and gravel quarry less than 60 feet from the Grand Calumet River (DCN 439, 1049). The quarry was excavated to

supply fill for construction of Interstate Highway 90 (I-90) and high grade sections of Cline Avenue in Gary, Indiana (DCN 413).

The Gary Development Landfill is approximately 35 feet deep and covers 60 acres. The landfill is located in the area bounded by the Grand Calumet River on the south, the Elgin, Joliet, & Eastern Railway and Gary Municipal Airport on the east, the Indiana Harbor Belt Railroad on the north and the Vulcan Materials Company plant on the west.

In 1973, the Indiana Stream Pollution Control Board granted a permit to Gary Development Company in 1973 to construct and operate a landfill facility (DCN 181). Gary Development Company began operations at the landfill in September 1974 (DCN 1049). By the end of 1974, the Indiana State Board of Health began to question the integrity of the facility (DCN 181). In an agreement with the Indiana Stream Pollution Control Board, Gary Development Company was to construct and install several leachate collection systems on the site, and line the pit with 10 feet of clay. Gary Development Company failed to meet these requirements before the opening of its facility (DCN 181).

By 1976, Gary Development Company was ordered by the Indiana State Board of Health to stop accepting hazardous wastes (DCN 34). Gary Development Company indicated in its RCRA Part A Permit application of November 14, 1980 that it accepted some hazardous waste (DCN 501). However, it currently denies that it has ever accepted hazardous wastes.

Gary Development Company accepted many different kinds of waste at the landfill including garbage, calcium phosphate, paint sludge, lime sludge, treatment sludge, reverberated slag, asbestos, aluminum oxides, fly ash, metal shavings, recovery and API tank bottoms, herbicides, sulfuric acid, solid corn starch, carbon filters, filter cake, lime slurry, Dripline, aluminum dross, furnace brick, vegetable oil, oil sludge and chopped battery casings. (DCN 61, 413, 528, 1077, 1095).

The Gary Development Landfill had a problem with the infiltration of leachate, oil, and river water into the landfill through the south (Grand Calumet River) and west (Vulcan Materials Company) walls (DCN 422, 1077). This may be due to an artificial water table depression under the landfill site (DCN 1049).

Gary Development Company also allowed unpermitted discharges of liquid leachate waste from the landfill collection system to flow into the Grand Calumet River. These discharges were not permitted by NPDES (DCN 181, 1049).

## **2.0 EPA REGION 5's SCOPE OF WORK**

As directed by the EPA Scope of Work, RAI accomplished the following objectives for the Gary Development Landfill:

1. Visited the offices of EPA Region 5 to collect and copy site information from appropriate sources.
2. Organized site documents and created a document index.
3. Updated addresses for all PRPs identified.
4. Presented PRP information obtained in this report.
5. Prepared a letter report summarizing the methodology used in gathering, organizing, and indexing the documents, and including all relevant database print outs.

### **3.0 PROJECT APPROACH**

With the approval of the EPA Work Assignment Manager (WAM), Joseph Kawecki, RAI completed a Records Search using information gathered from EPA sources. Examination of these records identified new PRPs. The Records Search consisted of five tasks, each of which is described below.

#### **3.1 Project Development and Management**

On February 12, 1991, RAI staff met with the EPA WAM, Joseph Kawecki, and the Secondary Contact, Carlton Cuffman, to discuss the project. At that time, RAI was directed to perform a Records Search for 13 sites in Northwest Indiana. In a subsequent meeting, the WAM selected six of the 13 sites which were to receive priority attention and narratives.

Weekly contact was maintained with either the EPA WAM or the EPA Secondary Contact throughout the performance of this work assignment.

#### **3.2 Records Search**

RAI reviewed and obtained copies of all pertinent governmental records in the EPA Region 5 files, including: Gary Development Company's response to a 104(e) Information Request Letter issued by the Technical Support Section; Waste Management Division, RCRA permit and compliance files; CERCLA Pre-Remedial and Emergency Response files; and, Water Division, National Pollutant Discharge Elimination System (NPDES) permit and compliance files.

#### **3.3 Organization, Indexing and Review of Documents**

Documents obtained were reviewed in detail. The documents were first organized by file source. Each page was sequentially numbered using a Bates stamp, a mechanical numbering device. Each document was given a unique document control number (DCN) corresponding to the number stamped on the first page of a given document. Information contained in each document was entered on a coding sheet. The coded information included: the DCN; a brief summary of the contents of each document; the source division; the date, author(s), and recipient(s) of the document, if present; the names of the PRPs it identifies; and, whether mention is made of any of the critical pollutants. The coded information was then entered into a database to be used as a document index (Appendix A).

### **3.4 Address Updates and Creation of Mailing Address Databases**

Addresses for all identified PRPs were updated and entered onto coding sheets. Sources for the updates included:

- 1) Ameritech Pages Plus: Gary White/Yellow Pages, 1989-1990
- 2) Directory of Corporate Affiliations vol. I and II, 1991
- 3) Illinois Bell/Ameritech Company Pages Plus: Chicagoland Business to Business Directory, 1991
- 4) Indiana Directory Assistance
- 5) Indiana Manufacturer's Directory 1990
- 6) Indiana Secretary of State's Office, Corporative Division

These data were entered into a computerized mailing address database of PRPBASE, EPA's proprietary PRP tracking program. A printout of this database appears as Appendix B.

### **3.5 Report Generation**

This report summarizes the methodology used in gathering, organizing and indexing the documents, as well as providing all relevant database printouts.

## 4.0 DESCRIPTION OF DATABASES

### 4.1 Document Index

Files were obtained from the Waste Management Division's Technical Support Section, Office of RCRA, Office of Regional Counsel, and the Emergency Response Branch. Also acquired were two reports from the U.S. Geological Survey: Geohydrology and Water Quality of the Shallow Ground - Water System in the Vicinity of the Grand Calumet River/ Indiana Harbor Canal, Northwestern Indiana (Preliminary Copy), by Joseph M. Fendon and Lee R. Watson (Indianapolis, Indiana, 1991) and Preliminary Analysis of the Shallow Ground - Water System in the Vicinity of the Grand Calumet River/Indiana Harbor Canal, Northwestern Indiana, by Lee R. Watson, Robert Shedlock, Konrad J. Beneszak, Leslie D. Anihad and Paul K. Doss (Indianapolis, Indiana, 1989). These two documents are referenced at the request of EPA.

An index of all documents is attached as Appendix A. All documents are arranged by their DCN. The index contains information as follows:

- |                  |   |
|------------------|---|
| 1) DCN           | - Document Control Number   |
| 2) Date          | - Date document was sent  |
| 3) Source        | - Source of EPA File  |
| 4) Author        | - Author(s) of correspondence and their employer  |
| 5) Recipient     | - Recipient(s) of correspondence and their employer   |
| 6) Title/Summary | - Description of document including contaminants of concern, references to permitted and unpermitted releases of waste products, and other significant information discovered |
| 7) Chemicals     | - Contaminants that were specified to be in the Area of Concern by EPA that are mentioned in the document   |
| 8) PRP Name      | - PRPs found in document listed by PRP Code, a unique three-to-six character identifier   |

#### **4.2 PRPBASE Mailing Address Database**

RAI inventoried all PRPs found in the Records Search. Information concerning each PRP was entered onto a data coding sheet. Coded information was then entered into the PRPBASE Mailing Address Database. The database contains:

- 1) PRP Name - Name of PRP found in documents
- 2) PRP Code - A unique three-to-six character identifier
- 3) Law Firm - Name of law firm, if known
- 4) Address 1
  - a) Address of site
  - b) Also used to note previous or new names
  - a/k/a Represents another associated name
  - f/k/a Represents a former name
  - n/k/a Represents a new name
- 5) Address 2 - Continuation of Address 1
- 6) City - City name
- 7) State - State abbreviation
- 8) Zip Code - Zip Code
- 9) Contact - Registered agent/individual responsible for responding to EPA
- 10) Address Type
  - Types of address
  - Type 1 = Primary address, often the facility
  - Type 2 = Secondary address

Every company whose name appeared in the documents has been considered a PRP for the purpose of this report. These PRPs can be divided into four distinct groups: current owners/operators; generators; waste transporters/disposal firms; and, miscellaneous PRPs. The following are lists of the above-mentioned groups of PRPs. Appendix B contains information regarding current addresses and registered agents for these PRPs.

#### 4.2.1 Current Owners/Operators

The current owner of the facility is not known due to the lack of ownership information in the documents obtained. According to the information obtained from a Dun and Bradstreet Report dated February 3, 1986, and found in a Gary Development Landfill RCRA Compliance file, the Site is owned and operated by the Gary Development Company (DCN 127). However, a Hazardous Waste Site Inspection Report dated April 4, 1980 states that the site is owned by Rock Road Construction Company of Brookfield, Illinois (DCN 381). No title search has been performed for the Gary Development Landfill.

The current operator for the landfill facility is the Gary Development Corporation (DCN 127).

#### 4.2.2 Generators

The following is a list of generators identified from the documents compiled for this project. These companies generated waste which was disposed of at the Gary Development Landfill. PRP names are given below exactly as they appear in the documents. Appendix B contains more information regarding PRP addresses.

- 9th Avenue Dump
- ABC Services, Inc.
- AMOCO Oil Company
- American Chemical Services
- Ashland Chemical Plant
- Borg Warner Chemical Division
- Brandenburg Demolition
- Calumet Wastes Inc.
- Calumet Waste Systems
- Centry Glass Securing
- Cities Services Refinery
- C.F. Petroleum
- City of Gary Landfill
- City of Hammond
- Cliff Rolland Dump

Conservation Chemical Company  
Consumers Roofing  
E.I. Dupont de Nemours & Company  
Energy Cooperative, Inc.  
Gary Airport Dump  
Gary Development Company  
Gary Land Development Liquid Disposal, Inc.  
Georgia Pacific  
General Drainage  
H.C. Evans & Company  
Independent Waste Systems, Inc.  
Indiana Waste Systems  
Industrial Disposal Corporation  
Industrial Rubbish  
Jenn-Air Corporation  
Jones & Laughlin Steel Company  
Kapika Drums  
K.A. Steel Chemicals  
Leader Industries  
Lender Industries  
Lever Brothers Company  
Long & Company  
LTV Steel Company  
Midco II/Mid Continental Systems, Inc.  
Ryan & Company  
Shell Oil Company  
Standard Steel Specialties Company  
Stauffer Chemical Company  
Union Carbide Corporation  
U.S. Reduction Company  
U.S. Steel  
U.S.S Lead Refinery, Inc.  
Vulcan Materials Company  
Western Scrap  
Youngstown Sheet and Tube Company

#### **4.2.3 Waste Transporters/Disposal Firms**

The following list, compiled from all available documents, identifies all entities transporting wastes to or from Gary Development Landfill. Appendix B contains more information regarding PRP addresses.

Calumet Waste Systems  
Chemical Waste Management, Inc. (Illinois)  
Chemical Waste Management (Indiana)  
City of Hammond  
Correct Maintenance  
Gary Land Development Liquid Disposal, Inc.  
Freymiller Trucking Company, Inc.  
General Drainage  
Independent Waste System, Inc.  
Industrial Disposal Corporation  
Kankakee Industrial Disposal  
Landgrebe Motor Transport  
Lender Industries  
Liquid Dynamics  
Mason Metal Company, Inc.  
Mr. Franks, Inc.  
Municipal Equipment & Services  
Rapid Liquid Waste Rubbish Removal  
Recycling Sciences Mobile Center  
Rozema Industrial Wastes  
Strand Trucking, Inc.  
Thomas Solvent Company

#### **4.2.4 Miscellaneous PRPs**

The following is a list of entities whose names appear in the documents but who do not fit into the above mentioned categories. Appendix B contains more information regarding PRP addresses. The following list does not include contractors for Gary Development Company or EPA, although they are listed in the employee database in Appendix D.

CID Corporation  
Wheeler Landfill  
Waste Management of Illinois

#### **4.3 PRP Chemical Databases**

Enforcement Confidential

As directed by EPA, RAI reviewed the compiled documents for any reference to 23 contaminants of concern. No determination was made as to whether the materials referred to in the documents were wastes or products. The PRP Chemical Databases (Appendix C) present separate printouts for each PRP. The Chemical Databases also list the contaminants of concern and include information regarding the DCN, date, and the title/summaries of the documents in which the reference was made. The PRPs listed in these databases are mentioned in the compiled records. RAI has not been able to determine if the PRPs included in these databases are responsible for any release of contaminants to the environment. RAI recommends that 104(e) Information Request letters be sent to these PRPs in order to more fully understand the connection between the PRPs and the contaminants at the site.

The following is list of the critical pollutants identified by EPA:

- PCBs
- Dieldrin
- Hexachlorobenzene
- 2,3,7,8-TCDD (dioxin)
- Chlordane
- Toxaphene
- Heptachlor/Heptachlor epoxide
- DDT/DDE
- Hexachlorocyclohexane
- 2,3,7,8-TCDF (furan)
- Benzo(a)pyrene (PAHs)
- Lead
- Mercury
- Nickel
- Cadmium
- Arsenic
- Copper
- Chromium
- Zinc
- Barium
- Manganese
- Iron
- Oil and other petroleum products

#### **4.4 Employee Database**

Appendix D is a listing of all employees identified in the documents compiled for this project. This listing includes information concerning the employee's position, title and employer, as well as the DCN of the document that references the employee. The listing is organized alphabetically by employer. If a consulting or laboratory firm was hired by a company or government office, the former is considered to be an employee of the hiring company or government office. Hence, a company may be listed as an employee in the database. Appendix A contains additional information regarding the DCNs referenced.

## 5.0 CONCLUSIONS AND RECOMMENDATIONS

Since Gary Development Company did not fully respond to its 104(e) Information Request letter, a follow-up letter should be sent to the Gary Development Company. Also, all generators, transporters and disposal firms connected with the Site should be sent 104(e) Information Request letters to fill the gaps that exist in the Gary Development Company's operating history. A title search is also recommended because available documents do not clearly indicate the current site owner or provide knowledge about the site.
